SprayMax® 1K Anti-Corrosion primer 400 ml Art. Nr. 680001

Product

Description / PurposeCorrosion protection primer with very good adhesion

properties.

Properties • Excellent corrosion protection

Very good adhesion

Welding test certificate

• Repels welding beads

· Can also be used on paint coatings

Material base Polyvinyl butyral, contains phosphoric acid

Colour Redbrown

VOC Value (EU) 677 g/l

Substrate

Steel (cleaned and sanded)

Galvanised steel (hot-galvanised, strip galvanised and electro-galvanised cleaned and sanded)
Aluminium, soft aluminium (cleaned and sanded)

Polyester surfaces (cleaned and sanded)

E-coat (cleaned and sanded)

Old paint and factory paint (cleaned and sanded)
The damaged area must be dry and free of grease

and dust and all rust needs to be removed.

Processing

Protection measures

Wear personal protection equipment. (respiratory mask/gloves/goggles)

For more information, see safety data sheet.

Shake

Shake can thoroughly for at least 2 minutes from when the mixing balls are heard.

Adjustable Nozzle

Set the variable spray nozzle to the size and pattern of the damage.

Spray to test

After shaking the can, test spray and check compatibility with the surface and the colour.

Spraying distance

15 cm - 20 cm

Spray passes

Dry film thickness welding primer $6 - 10 \mu m$ (1 spray coat)

Dry film thickness primer 2 - 3 spray coats each 10 - 15 μ m

Flash-off time

Flash time: approx. 3 - 5 min between each

spray coat.

Paintable: 10 - 15 min. / 20° C

Processing conditions

Optimum application at 18° C - 25° C and a relative humidity from 40 - 60 %.

Coverage

approx. 0,5 - 0,75 m² at 30 µm dry film thickness

Drying

TG1 dust dry: 5 min

TG5 fully cured: 15 - 60 min. / 20° C min
The stated values refer to the above mentioned processing conditions. The level of dryness is determined pursuant to DIN 53150.

IR: 5 - 8 min.Observe equipment description

Continue

Can be topcoated with allconventional primers and topcoats. SprayMax® 1K SELF ETCH WELD THRU PRIMER REDBROWN has a 3 months weathering resistance on steel stored in the open air. Hereby the dried coat thickness should not be less than 50 µm.

dry sanding with P 360 - P 500

Wet sanding with P 800

Finish

After painting, turn the can upside down and spray for 3 - 5 seconds to clean the valve.

Additional Information

Important Information

Avoid bumps, friction and impact.

Do not apply polyester and EP top coat products.

Do not use on thermoplastic paintwork.

Do not coat with water-based paints.

Shelf Life

60 months

The usage period refers to an unused can that is stored correctly at a temperature of 15 - 25° C and a relative humidity below 60%. The can must be stored and transported in an upright position in a dry place where it is protected against chemical and mechanical influences. The safety information on the can and all statutory provisions applicable for the storage site must be observed.

Disposal

The completely emptied spray cans must be disposed of in the recycling system. Cans with hardened material must be disposed of as special waste.
