SprayMax® 1K Plastics Spray DTP Dark anthracite 400 ml Art. Nr. 680045

Product

Description / Purpose

A product designed for the fast and convenient spray painting of plastic surfaces. Available in three most popular colors. Can be applied directly on any plastic surface without the need of applying a plastic adhesion promoter. An ideal addition to the already available structure paints.

Properties

- Can be applied directly on plastic surfaces
- Available in the most popular gray shades
- Very good adhesion
- Fast drying
- Can be topcoated at any time

Material base

Special resin combination

Colour

Dark anthracite

Gloss level

matt

VOC Value (EU)

28 gloss units at 85° measuring angle

656 g/l

Substrate

Polypropylene (PP, PP/EPDM), Polycarbonate (PC), Polystyrene (PS), Polyvinyl Chloride (PVC), Acrylic nitrile butadiene styrene (ABS) and other Plastics.
(cleaned and sanded)

In case of doubt, the compatibility of the paint for the respective substrate must be pretested and, if necessary, a suitable pre-treatment method (e.g. tempering/adhesion promotor) must be chosen. Check compatibility and adhesion first on an unobtrusive area. If necessary prime with a suitable Plastic Adhesion Promotor.

Processing

Protection measures

Wear personal protection equipment.
(respiratory mask/gloves/goggles)
For more information, see safety data sheet.

Shake

Shake can thoroughly for at least 2 minutes from when the mixing balls are heard.

Spray to test

After shaking the can, test spray and check compatibility with the surface and the colour.

Spraying distance

15 cm - 20 cm

Spray passes

Dry film thickness 30 µm
(approx. 2 - 3 spray coats)

Flash-off time

Flash time: approx. 5 - 10 min between each spray coat

Processing conditions

Optimum application at 18° C - 25° C and a relative humidity from 40 - 60 %.

Drying

TG1 dust dry: 15 min
TG3 dry to touch: approx. 40 min
TG5 ready for assembling: 4 h

The stated values refer to the above mentioned processing conditions. The level of dryness is determined pursuant to DIN 53150.

Continue

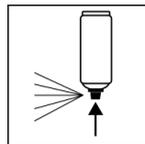

IR: approx. 35 min.

Observe equipment description

Can be topcoated with itself at any time (observe flash time). Wet-on-wet with SprayMax Structur paint to achieve requested structure. Flash time 5 - 8 min. First use Plastic spray DTP.

Finish

After painting, turn the can upside down and spray for 3 - 5 seconds to clean the valve.

Additional Information

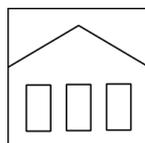

Important Information

Avoid bumps, friction and impact.

Not suitable for plastic parts made from PE. Do not apply to any safety-relevant plastic parts, e.g. helmets. Do not apply to surfaces coated with synthetic resin paints as this could lift and cause ripples in the paintwork underneath.

Shelf Life

60 months

The usage period refers to an unused can that is stored correctly at a temperature of 15 - 25° C and a relative humidity below 60%. The can must be stored and transported in an upright position in a dry place where it is protected against chemical and mechanical influences. The safety information on the can and all statutory provisions applicable for the storage site must be observed.

Disposal

The completely emptied spray cans must be disposed of in the recycling system. Cans with hardened material must be disposed of as special waste.

Note

For professional use only.
