

DIAMOND CUT 3000

Coarse

**INGENIOUS
CAR CARE**

Products for professionals

This product is part of **REFINISH**

Description:

Cartec Diamond Cut 3000 is a compound with exceptional deep cutting, making it the perfect choice for hard and scratch-resistant paints. It quickly and effortlessly removes deep scratches, sanding marks (P1200 and upwards), spray mist, orange peel, dust, sags and runners. Additionally, it is highly effective on newly painted surfaces.

Product benefits:

- ✓ Fast and deep cutting
- ✓ Time-saving
- ✓ Easy to buff off
- ✓ Provides instant high gloss
- ✓ Free of silicones, ammonia and fillers
- ✓ Highly effective on fresh paintwork

Application:

Cartec Diamond Cut 3000 is suitable to remove sanding marks (P1200 and upwards), deep scratches, overspray, orange peel, dust, sags and runners.

Instructions for use:

1. Determine the working surface within shoulder width and six times the area of the polishing pad.
2. Apply 3 pea-sized dots (for $\varnothing 125\text{mm}$) of Cartec Diamond Cut 3000 to the polishing pad.
3.
 - Rotary: take the Cartec green pad for rotary machines (RF2110 for $\varnothing 125\text{mm}$). Spread the product on the lowest setting and increase the speed to 1200 - 1500 rpm.
 - Dual Action: Take the Cartec green pad for dual action machines (RF2116 for $\varnothing 125\text{mm}$). Spread the product on the lowest setting and increase the speed to 3500 - 4800 rpm.
4. Work in sections while applying even pressure. Continue until the scratches are removed.
5. Clean the surface thoroughly with the Cartec Microfibre Cloth Green (RF2203C) to remove all polish residue.

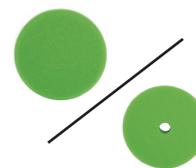

Tips & Tricks:

- ✓ Use Cartec Panel Spray (REFLSP) to completely degrease the surface, remove remaining polish residue and review the actual condition of the paintwork.
- ✓ When using a rotary polisher, do not keep polishing in the same spot for too long to avoid overheating the paintwork.
- ✓ To make fixing serious imperfections or different clearcoat issues easier, start by using fine-grade abrasive discs. This simple step can help you work more efficiently.
- ✓ Use a 3000-grit foam disc in the fine-grade abrasives process to reduce polishing time.

Required items:

Cartec Rotary Polishing Machine (3096/40) / Cartec Dual Action Polishing Machine (3096/60)

RF2110 / RF2116
(Also available in other sizes).

RF2203C
