

ERASER PAD + ADAPTER

GENERAL

CODE	DESCRIPTION
REP100	Eraser pad + adapter ø100
REP200	Eraser pad + adapter ø88

DESCRIPTION

The Gerko rubber eraser pad is specially designed for safe and efficient removal of stickers and adhesive residues, without leaving scratches on paint or glass.

Thanks to the integrated thread, the pad can be easily mounted on an angle grinder or drill. The high-quality rubber ensures fast and effective cleaning of surfaces such as car paint, windows, and other smooth materials without causing damage.

Ideal for professional removal of stickers, foils, and adhesive residues.

The serrated Gerko rubber removal pad (REP100) works three times faster than traditional glue erasers. Due to its serrated shape and extra thickness, the disc lasts longer and provides better cooling.

PROPERTIES

- Delivered with adapter
- Removes without damaging the surface
- Recommended speed between 2,000 and 4,000 rpm
- There is no need to use chemicals that can damage the paint
- To use the removal pad with a drill, an adapter bit is required.

REP100

- Due to the ridge the paint doesn't heat up which results in no paint damage
- Works 3x faster than traditional eraser pad
